

Make-Your-Own Water Cycle Wheel

Directions:

Now that you've printed out the two circles, it's time to make your water cycle wheel! Color the pictures on the two big circles with your favorite colors. When you are finished coloring, cut out the two circles and the four "cut outs" that are on Circle 1. Attach the two circles together (one on top of the other) with a metal fastener through a hole in the center. Put the circle with the cut outs on top. Using the tab on circle two, turn the circle counterclockwise and see the water cycle at work!
